

## Health Camp Organized under Azadi Ka Amrit Mahotsav at ICAR-NAARM

12<sup>th</sup> August, 2022

To celebrate the 75<sup>th</sup> Azadi ka Amrit Mahotsav, ICAR-National Academy of Agricultural Research Management, Hyderabad had conducted a health camp for lipid profile testing on August 12, 2022. Preference was given to the contractual workers, RAs, and YPs as they are not entitled to free medical facilities. Camp commenced at 9:00 a.m. and a total of 40 people were investigated (Male-27 and Female-13), out of which 16 people were detected as having abnormal lipid profile results. They were given the necessary medical advice. This type of health camp, including investigations, is part of the regular activities of our health centre.

Investigations were conducted at the Health Centre under the supervision of our Medical Consultants, Dr A. Debnath and Dr Hima Bindu at no cost with the help of Aristo Pharma company. Contractual workers of the Academy have benefited immensely from this camp. We will conduct another similar camp shortly.
