

Online Training Programme on “Multivariate Data Analysis using R” concludes at ICAR-NAARM

26th July 2024, Hyderabad

A 5-day training programme on “**Multivariate Data Analysis using R**” was organized from 22nd-26th July 2024 by ICAR-National Academy of Agricultural Research Management, Hyderabad. The programme focused on equipping participants with advanced analytical techniques necessary for interpreting complex data, making informed decisions, and producing high-quality research outputs. During the feedback session, participants expressed high levels of satisfaction with the programme. They appreciated the opportunity to learn from leading experts and highlighted the convenience of the online format, which allowed them to participate without significant disruption to their regular work schedules.

Dr. Ch. Srinivasa Rao, Director of ICAR-NAARM, addressed the participants during the valedictory session. He highlighted critical importance data analytics for the National Agricultural Research and Extension System (NARES) to keep pace with the rapid advancements in analytics. He also emphasized that scientists should make optimal use of the data collected through various experiments to enhance the impact and quality of their research.

A total of 79 participants from diverse disciplines and 20 different states attended the program.
