

Training Programme on Advances in Mobile Application Development Concludes

9th August 2024, Hyderabad

ICAR-National Academy of Agricultural Research Management, Hyderabad, organised a 5-day online training programme on 'Advances in Mobile Application Development' from 5th to 9th August 2024. The training programme aimed to enhance participants' awareness of the latest mobile application development advancements and provide comprehensive education on various software tools and technologies used in the field.

Dr. Ch. Srinivasa Rao, Director of ICAR-NAARM, emphasised the crucial role of digital education in our fast-changing world. He stressed the necessity for professionals to maintain digital proficiency to keep up with global demands and technological progress. Dr. Rao also highlighted the importance of mobile application knowledge, noting its key role in improving the efficiency and coordination of agricultural activities. He urged the participants to utilise digital tools to empower the farming community and foster innovation in agriculture.

The 5-day training programme provided participants with practical experience covering key topics such as Android architecture, features, and installation. Participants learned to create Android applications, design user interfaces, manage activities, and build layouts. The programme was well-received, equipping participants with valuable skills for their respective fields.

A total of 51 participants, from the ICAR Institutes, State Agricultural Universities and Krishi Vigyan Kendras attended the training programme.
