

Training Programme on 'Multivariate Data Analysis using R' concludes at ICAR-NAARM

Date: 30th August, 2024

The ICAR-National Academy of Agricultural Research Management, Hyderabad organized an in-person Training Programme on 'Multivariate Data Analysis using R' during 26-30 August, 2024.

Twenty-one (6 females) participants from various research and educational institutes including ICAR institutes, SAUs and private industries participated in the training programme. The programme content included theory and practical sessions on various multivariate analysis techniques such as generalized models, regressions, principal component analysis, factor analysis, cluster analysis etc. using R.

During the Valedictory programme, Dr. Ch. Srinivasa Rao, Director, ICAR-NAARM highlighted the need for employing advanced statistical analysis techniques for impactful research and publishing the results in high quality journals.

Earlier, Dr. Ramasubramanian V, I/C Joint Director, ICAR-NAARM stressed upon the use of appropriate statistical analysis techniques for obtaining correct results. Dr. A Dhandapani, Head & Programme Director highlighted the importance of statistical analysis for researchers.
